Profile

As a dedicated fourth-year Bachelor of Science student in Computer Engineering, I am passionate about leveraging technology to solve complex problems. Throughout my academic journey, I have honed my skills in various programming languages and project management. I am eager to apply my theoretical knowledge to real-world challenges in the field of computer engineering. My goal is to contribute to innovative projects that push the boundaries of technology while continuously expanding my expertise in this ever-evolving field.

Education

Istanbul Technical University, Bachelor of Science in Computer Engineering September 2021 –
• **Coursework:** Deep Learning, Data Structures and Algorithms, Machine Learning

Experience

NTT Data Business Solutions, IT Department July 2025 – August 2025
• **Work:** Microsoft Azure Systems, SQL , Databases and Servers

Projects

GPR and AI for Building Digital Simulation March 2024 -
• A project that aims to combine GPR machine and Artificial Intelligence to simulate the building and reveal its weaknesses.
• Tools Used: C++
Detection of Liver Steatosis from Microscopy Images (Supported by TÜBİTAK) October 2025 -
• A project that detect Liver Steatosis from microscopy images with deep learning.
• Tools Used: Python

Skills Profile

Programming Languages: C++, C, Python, SQL

Languages: English (Upper intermediate), Turkish (Native), Italian (Entry level)

Developer Tools: VS code, Git
